

# PRODUCTION OF TEMPERED GLASS AND INSULATING GLASS UNITS

PARITETCOMPANY.COM

# ABOUT US

PAVLO CHEHAK  
CEO PARITET

PARITET was founded in 1996 and has been manufacturing translucent structures since its inception.

Large in-house production facilities and the best European equipment allow us to work and provide Ukrainian cities with quality products. All these years, we have been improving every process, minimizing costs and saving energy resources step by step.

PARITET is not resting on its laurels, but is increasing its production rates and striving to develop new markets.

The company makes strategic decisions in compliance with all market rules and fair competition. Each achievement is brought to perfection and successfully implemented.

The mobility of decision-making makes it possible to meet European quality standards depending on market needs and new technologies.

PARITET is open to new and interesting projects and is the undisputed leader in the Ukrainian market of translucent structures.

# OUR PRODUCTION ADVANTAGES

tempering  
furnace  
6000\*3000mm

Large format  
Triplex  
production  
equipment  
4000\*2400 mm

Automated  
insulating glass  
unit assembly lines  
5000\*2700mm,  
high production  
speed

Automated glass  
painting line,  
perfect painting  
results without  
defects with a  
warranty of up to 10  
years

Annual production  
volume of  
tempered glass is  
over 150,000 sq.m.

Certificates of  
conformity  
confirming the  
high level of  
production.

# OUR SERVICE ADVANTAGES

A complete closed cycle from design to production allows us to quickly and efficiently manufacture a product of almost any level of complexity.

Supply comprehensiveness. Our own production facility with the widest range of glass processing capabilities allows us to produce various types of finished products and offer a wide range of products. Therefore, our customer receives maximum work on their project from a single supplier.

Only high-quality materials and components. PARITET uses the most advanced equipment and has high requirements for product quality.

Close cooperation with international suppliers of materials and components, their involvement in project development to fully meet customer requirements and ensure the highest quality and safety.

In-house transport logistics department that provides transportation across Europe and the CIS. Transportation of 20- and 40-foot containers and any cargoes allowed for transportation in tilt semi-trailers. The company operates under its own TIR and CMR. The company's fleet is equipped according to Euro 5 environmental standards.
